- ▶ Etched text front stainless steel panel fascia
- ▶ Compatible with Safe-Point loop connectivity panels only

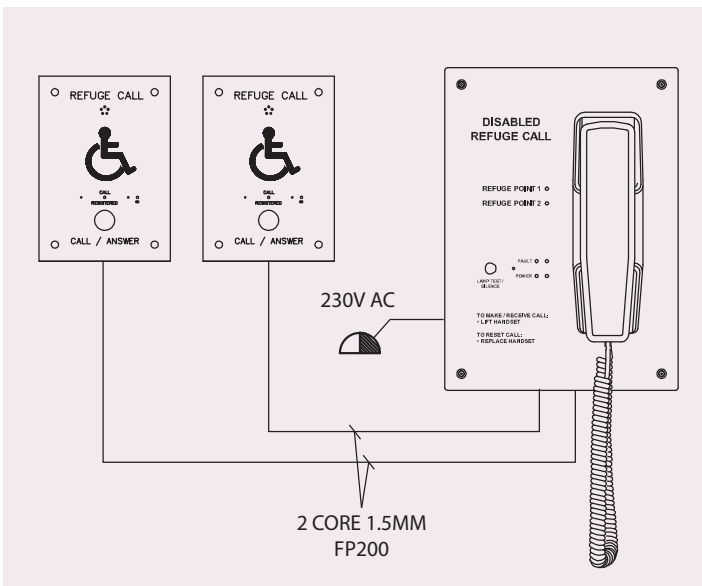

Description

The K41400SST is a weather resistant 'Type B' call/answer point, fully compatible with Kentec's Safe-Point range of products.

Fitted at Disable Refuge locations, at the touch of a button, the unit provides the means to effectively voice communicate with building control operatives. LED status indicators provide a visual sign that a call is registered and that power to the unit is healthy. An integrated induction loop provides assistance to hearing aid users.

Typical Installation Scenario

Unit
