Wireless Service Applications

Validate field devices. Audit system configuration. Test life safety network integrity... all single-handedly.

Wireless Service Applications from EDWARDS® are ingenious protocols that take system diagnostics out to the field where it belongs. It allows a single technician to test system operation and immediately see the result of simulated alarms and status changes on a laptop or compatible mobile tablet.

With these applications, complex programming can be verified, logged, and documented on the fly.
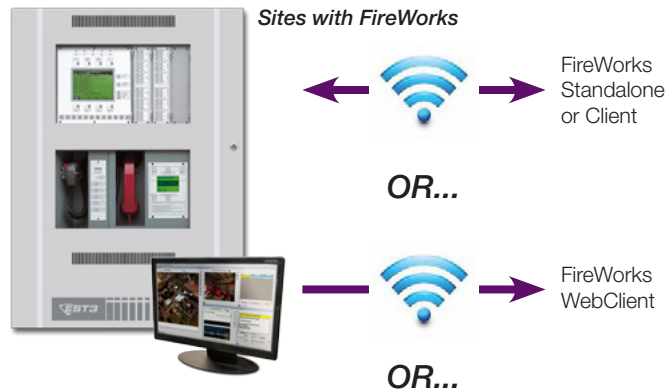

A technician walks your facility equipped with only a mobile tablet. He can trigger events and immediately see how the system responds.
The Result: testing, validating, and auditing is now efficient, effective, and economical.

- Ensures your incident management system operates as designed

- Eliminates the need for multiple technicians for testing

- Reduces system down-time.

- Includes direct logging feature

- Deploys without changes to system topology

- Comes with test report capability

Wireless Service Application is supported for systems that use 3-SDU V5.3x and later, and FireWorks V8.x and later. Ask your EDWARDS Strategic Partner how you can ensure your facility benefits from this cost-saving technology.

EDWARDS Strategic Partners:

Innovation, leadership, and a rich tradition of excellence...

Whether EDWARDS life safety systems are protecting the lives and livelihoods of the people who make businesses run, or the lives entrusted to the care of public institutions; whether they're charged with protecting the guests of the world's finest hotels, or preserving irreplaceable artifacts that bring history to life; EDWARDS is associated with critical and far-reaching life safety systems.

Our strength is in our Strategic Partners — the people and organizations we entrust with the technology that has charted the course of life safety protection for decades. Strategic Partners are not middlemen or go-betweens. They are independent contractors who add value to the EDWARDS life safety solution. They enjoy exclusive access to products, custom design innovations, and factory training. Yet as successful independent contractors, they are adept at ensuring that each submittal is strong and competitive, and that each bid is locally relevant to your installation. As local businesses they not only have to earn your trust — they have to keep it.

Together these strengths set EDWARDS installations apart, and have earned this brand a special place among life safety and security solutions available today. Perhaps that's why many of the world's most cherished landmarks are protected by EDWARDS products. From the Bibliotheca Alexandrina Museum in Egypt, to the modern-day sphinx at the Luxor Hotel in Las Vegas, professionals who design, own and occupy the world's most impressive structures have chosen the EDWARDS solution.
